[Fixed]Call REST Service on CSP Gateway Server

Hello,

I have a DB server (ser-app-db) where cache is installed as server.

I have a Web server (ser-app-w) where cache is installed as web server and configured as CSP gateway.

I followed the configuration guide (<https://docs.intersystems.com/latest/csp/docbook/DocBook.UI.Page.cls?KEY...>) and ser-app-w perfectly display the CSP and CLS pages.

But that's not working for my REST service, for exemple with the REST sample:

<http://ser-app-db/csp/samples/docserver/request>(GET): work and show the request

<http://ser-app-w/csp/samples/docserver/request>(GET): return a 404.

Can someone help me ?

Thanks

Sébastien
