How to change the Ensemble by InterSystems logo?

My boss would like to change the Ensemble logo that one sees in the mangement portal, because it's part of the DeepSee Anaylzer.

I can see where it lives on the generated html.

I kow that you can set the logo for the User POrtal settings in DeepSee -- you can specifiy a URL for your logo. But we'd like to go one stee further and change the Ensemble by InterSystems to our own logo /company name.

Is it possible to change this in the code? Is there a Configuration setting to change this?

Thanks,

Laura
