Deleting/renaming productions

I have a few productions that my developers named "TEST" and would ideally would like them to have more relevant names. Is there a way to rename a production? I tried exporting and deploying the production under a new name and it worked, but my new production is empty. Also I'd like to delete a production that is in a suspended state. When I attempt to delete the suspended production, I get errors that the production isn't stopped, so can't be deleted. I can't start it to clear the suspended status, either. I get the following error:

```
14:26:18.126:Ens.Director: Production 'CHSLI.TEST' starting...
14:26:18.126:Ens.Director: ERROR <Ens>ErrException: <CLASS DOES NOT EXIST>zStartProdu
ction+40^Ens.Director.1 *CHSLI.TEST -- logged as '-' number - @' Set tSC=$classmethod
(pProductionName,"OnStart",tStartTime) Quit:('tSC)'
14:26:18.126:Ens.Director: ERROR <Ens>ErrException: <CLASS DOES NOT EXIST>zStartProdu
ction+40^Ens.Director.1 *CHSLI.TEST -- logged as '-' number - @' Set tSC=$classmethod
(pProductionName,"OnStart",tStartTime) Quit:('tSC)' Production 'CHSLI.TEST' not start
ed: ERROR <Ens>ErrException: <CLASS DOES NOT EXIST>zStartProduction+40^Ens.Director.1
 *CHSLI.TEST -- logged as '-' number - @' Set tSC=$classmethod(pProductionName,"OnSta
rt",tStartTime) Quit:('tSC)'
```

Thanks, Lewis
