Zen Report - ErrorNo: 5540

I'm working on an existing Zen Report that uses queryClass/queryName to retrieve data using a class that has a Stored Procedure method. Which works fine.
I have created second class with a Stored Procedure method, I modified the zen report to use this class and now I'm having the following error.

```
Error: SQLCODE: -99 Message: User UnknownUser is not privileged for the operation
ErrorNo: 5540
```

Regards,

Rui
