New Programming Language - Discussion

(Photo by [Jeremy Thomas](#) on [Unsplash](#))

Dear Developer Community!

My name is Maks.

I developed [DeclarativeCOS framework](#) for declarative programming on COS.

Today I want to ask you about New Programming Language.

I have an idea to create new programming language which could be translated to COS classes / routines or even to int-files.

So, lets suppose it is happened. What do you want to see in such language?

Please feel free to say your minds. It is open discussion.
