Developer Video of the Week: Building Modern Web Applications

Hi, Community!

Please welcome the first session recording from Global Summit 2017:

[Building Modern Web Applications](#)

In this video learn, how to develop a modern single-page web application. The approach is to build a simple Angular application and connect it via REST to Caché.

You can also view all the slides by visiting [this link](#) and check the source code of the project on [GitHub](#).

What's new?

We have created a new [dedicated Global Summit 2017 playlist](#). It will be gradually updated with interesting and useful videos from the past InterSystems annual gathering.

Enjoy and don't forget to follow the [InterSystems Developers YouTube Channel!](#) 

[#Angular](#) [#Video](#) [#Frontend](#) [#Global Summit](#)
