Convert a timestamp into its corresponding date

Hi world ,

when i apply this command :

```
USER>write obj.biometrics.%Get(0).timestamp
```

i've this timestamps form : 2017-05-17T13:45:40

but in my program i want to have a standard form " date & time" like (2017-05-17 13:45:40)

Please how can i do? is there any method in the " [%Library.TimeStamp](#)" that allow this kind of operations?

thank you for helping.
