## Export macro in "Export for production"

Hi all,

According to the post [How to Export and Import Ensemble Components and Productions](#) we can create a unique file to implement and deploy a production, but I'm not able to export and import macro file in the process.

I've been looking for how to implement the macro file in this process but I haven't found anything.

is it possible to export and deploy the macro file in the "Export from Production"?

Best regards,

Francisco Lopez
