## Two new videos: Working with Containers

Hi, Community!

This week we have two videos. Check all new session recordings from Global Summit 2017:

1. [Containers for InterSystems Technologies](#)

You can learn how to reduce risk in your production environment by using containers. This video shows how containers can provide a consistent environment for development, testing, and production.

2. [Go Beyond Configuration Management](#)

This recording shows how to automate the building of a container. The approach is to discuss how to use the Docker build command to derive a container from the Dockerfile manifest and to give an example of the process by deriving a container from InterSystems container images.

See additional resources to these videos:

- [InterSystems Cloud Manager and Containers at GS2017 XP-Lab](#)
- [learning.intersystems.com/course/view.php?id=737](https://learning.intersystems.com/course/view.php?id=737)
- <https://learning.intersystems.com/course/view.php?id=696>

And what's new on [InterSystems Developers YouTube Channel](#)? We have created a new [dedicated Docker and Containers playlist](#).

Enjoy and stay tuned! 😊
