How to read CSV file contents into Objects in Cache

I have this code here;I am trying to read a csv file but when I run this code I
get <LIST>%open+3^%stream.Object.1 would anyone have a look and tell me where I am going wrong .Record
mapper is fine but I need a custom csv Importer

```
ClassMethod ImportCSV()
{
    set adapter =##class(%File).%New()

  set status=adapter.%Open("C:\In\in.csv")

  if $$$ISERR(status)
  {
   do $System.Status.DisplayError(status)
  }

  set counter =1

  while 'adapter.AtEnd
  {
   set line=adapter.ReadLine()

   set rec= ##class(CSVRecord).%New()

   set rec.ID=$piece(line,",",1)
   set rec.FName=$piece(line,",",2)
   set rec.SecName=$piece(line,",",3)
   set rec.Gender=$piece(line,",",4)
   set rec.Age=$piece(line,",",5)

     write rec.ID,

             rec.FName,

         rec.Secname ,

         rec.Gender,

         rec.Age,!

      Set savestatus=rec.%Save()

     if $$$ISERR(savestatus)
    {
     do $System.Status.DisplayError(status)
    }

     }
```

```
        //If error found during processing,show it
        if $$$ISERR(status)
        {
         do $System.Status.DisplayError(status)
        }
    }
```
