Issue transforming CSVFile To An XML File

I have a business service that brings in a xml virtual document to the production and also a csv service that brings in a csv file and have a process that transforms both to a xml output but I have a problem with the csv as it is giving me this error when I try to trans form it` ERROR <Ens>ErrException: <PROPERTY DOES NOT EXIST>zOnRequest+1 ^EnsLib.MsgRouter.VDocRoutingEngine.1 *DocType`I have read [here](#) followed the suggestion but now I do not get any errors but my message is not being routed here is the rule set that I am using

[#Business Process (BPL)](#) [#CSV](#) [#DTL](#) [#XML](#) [#Ensemble](#)
