## Webinar: Introducing InterSystems IRIS Data Platform™!

Learning Services Live Webinars are back!

At this year's Global Summit, InterSystems debuted InterSystems IRIS Data Platform™, a single, comprehensive product that provides capabilities spanning data management, interoperability, transaction processing, and analytics. InterSystems IRIS sets a new level of performance for the rapid development and deployment of data-rich and mission-critical applications. Now is your chance to learn more!

Joe Lichtenberg, Director of Product and Industry Marketing for InterSystems, presents "[Introducing InterSystems IRIS Data Platform](#)", a high-level description of the business drivers and capabilities behind InterSystems IRIS.
