## How to find duplicates for a large text field in Caché Objects?

Hi, folks!

Suppose you have a Caché class with %String property which contains relatively large text (from 10 to 2000 symbols).

The class:

```
Class Test.Duplicates Extends %Persistent
{
Property Text As %String (MAXLEN = 2000);
}
```

And you have thousands of entries.

What are the best options to find entries which are duplicates on this property?

[#Indexing](#) [#Object Data Model](#) [#ObjectScript](#) [#Caché](#)
