Reading a zip file into a stream

I am using Cache FTP classes to download from a FTP site files, that include zip files.

I can retrieve the whole file into a stream, but it contains a lot garbage.

Sample:

```
PKv^ZK! XÃx$^24rNDDF Plus DB/Counseling Messages/CMM 1.0/RCMMD0DESCNUnNUCX4NDDF Plus
DB/Counseling Messages/CMM 1.0/RCMMD0DESC'½[ ÛH .ø¾fûð²ê* -i Q[ ©n]²i®Ò º§i> $HbØ )Êâ
Ç÷i=P 9gmlª .ý|4 Í
ñ)>$Uô îðäú6K 2Jó(ù¼Mª þ2»¢J*ócåÅ%°ÄIt*J
úO²K·i Ê1Î£' Êd[ NI¾Kvÿ÷ÿ5 &faìÛ]| Nñçh_ Ñö f»2ÉM g4A'KiÜ%ÙE +Qo/Ei-d0VQl s;¢ ||£ñ$º
lj>]xL| Ê¢8E ätNÊøR xdl¿V4iz8^^Dþ3óp±Hwî©«h[ä 8ÍÓüUñ)1ô .&ùå ê[\..G°K7Æxcè
```

Is there a way to copy the zip file from the FTP site down without going through a stream?

Inside the zip file is 400+ files and directories.
