New Video: Backup Essentials - Protecting Your Data

Hi, Community!

Please welcome a new session recording from Global Summit 2017:

[Backup Essentials - Protecting Your Data](#)

This video shows the difference between data resiliency (high availability/disaster recovery) and backups, including the pros and cons of each approach. The approach is to discuss the importance of backups as a way to protect data from ransomware, computer viruses, and human error and to provide information about backing up data, including using 3rd party enterprise backup tools.

Please check [additional resources here](#).

Enjoy! 😊
