New InterSystems Online Course: Getting Started with ICM

Hi all! We have just released a new online course, [Getting Started with ICM](#), that provides an introduction to InterSystems Cloud Manager (ICM) -- one of the new technologies coming with the release of InterSystems IRIS!

After taking this one-hour course, you will be able to:

- Explain what ICM is and the business benefits that come with it
- Identify the major cloud computing providers and the benefits of cloud computing
- Provision a multi-node infrastructure on your selected cloud platform
- Deploy your InterSystems IRIS applications to your provisioned infrastructure
- Unprovision your infrastructure to avoid costly charges
- Run additional commands to further manage and modify your cloud deployments with ICM

We hope you enjoy the course!
