Client description OAuth2

Hi community ,

i come back to you , i've a problem with Client description in OAuth2, when i tick the Supported grant types and i save , there are not registered on the OAuth2Client.Metadata table .

can you tell me where is the problem please.

you will find attached a screenshot.

thank's

Menu Home | About | Help | Logout System > Security Management > OAuth 2.0 Authorization Server Configuration > OAuth 2.0 Server > Client Description

Client Description Server: **InterSystem** Namespace: %SYS User: **_SYSTEM** Licensed to: **Visiomed** Instance: **HSIE**

Save Cancel Client Description

Use the form below to edit an existing client description which has been registered with the OAuth 2.0 authorization server:

General Client Credentials Client Information JWT Settings

Name: Sys2 Required

Description: desc

Client type: ☐ Confidential ☐ Public ☒ Resource server Required

Supported grant types (check at least one): ☐ Authorization code ☐ Implicit ☐ Resource owner password credentials ☐ Client credentials

Supported response types (check at least one): ☐ code ☐ id_token ☐ id_token token ☐ token

Authentication type: ☐ none ☒ basic ☐ form encoded body ☐ client secret JWT ☐ private key JWT
