Atelier client keeps breaking on Mac

Hi-

I have Atelier client installed on a Mac and every now and then it just stops working. Currently I am getting this error when I try to synchronize my workspace with the server.

Synchronization failed: [server is broken] java.lang.ClassNotFoundException: Provider org.glassfish.jersey.internal.RuntimeDelegateImpl could not be instantiated: java.lang.IllegalStateException: No generator was provided and there is no default generator registered

Is anyone else experiencing similar problems and if so, what is the work around?
