What it means the Alerts CPU Message

I want to understand how this message is build:

[SYSTEM MONITOR] CPUUsage Alert: CPUUsage = 99, 99, 99 (Max value is 85).

Caché keep a log of cpu usage (99,99,99) and how is the frequency of check of this?

how can i change the max value? is that possible?

Best,

[#Monitoring](#) [#Caché](#)
