Does anyone use EnsLib.ITK.DTS.Framework.Operation.DTSTransferFile? and how did you manage the transition to MESH?

Does anyone use EnsLib.ITK.DTS.Framework.Operation.DTSTransferFile? and how id you manage the transition to MESH?

I just noticed this PR from 2011

https://www.intersystems.com/news-events/news/news-item/itk-2-0-0-compliance-for-intersystems-ensemble-makes-it-easier-and-cheaper-for-nhs-trusts-to-exchange-information/

which led me to this class EnsLib.ITK.DTS.Framework.Operation.DTSTransferFile

Given this was 2011, and DTS (now called MESH) is widely used by GP practices, I'm hoping someone in the community used this class?

If so - how did you manage the transition to MESH in Jan-2017?
