greater-than or equal to sign in ZEN select component

Hi

Is it possible to include the or in a ZEN select component? i.e.

```
<select id="condition" label="Condition" valueList="&lt;,&gt;,&=,&?,&?" displayList="&lt;,&gt;,&=,&?,&?" />
```

I have tried ≥ and ≤ but these also do not work. If I inspect the options in the browser and edit with these characters they display correctly but just not when loaded in the zen page.

Cheers

Iain
