For and If with one line: to brace or not to brace

Hi Community!

Coding guidelines discussion. Consider you have For with one command in the cycle. Here are the options:

One

```
For i=1:1:1000 set ^Test(i)=""
```

Two

```
For i=1:1:1000 {
 set ^Test(i)=""
}
```

Same for the "If":

```
if a set b=a
```

or

```
if a {
 set b=a
}
```

Your choice? Or maybe even other options?
