## Service Unavailable while invoke rest url

Hi. I am learning create Rest service with Cache. From this repo. <https://github.com/intersystems-ru/REST>

I created new web application from Web Applications section in Management Portal. Such as screenshot. In browser call <http://127.0.0.1:57772/rest/test> . But got "Service Unavailable" 503 response. Could you please help?

Edit definition for web application /rest:

The screenshot shows the 'Edit definition for web application /rest' configuration page. The 'General' tab is selected. The configuration includes:
