## Developer Community Release February 2018

Hi, Community!

We have a new release of Developer Community here!

What's new?

Better subscriptions, new notifications on answers, better performance, better member mentioning and public task tracker for DC.

See the details inside!

### 1. Revised subscription module

We would be glad if you subscribe to everything on DC. There is only one switcher for that on the MyAccount->Subscription page:

To subscribe to all the posts:

**New posts**

Send email notifications when new post published.

To also to get all the comments and answers:

**Subscribe to comments**

Send email notifications when new comments and answers published.

But, if you want a more granular subscription, you can subscribe to posts, members, groups and tags you interested in.

For Groups and Tags subscriptions we introduced a new module, where you can see the list of current groups and tags you subscribed to. Above it, you can see Groups and Tags available for subscription. See that short video which describes how you can manage your Groups and Tags subscriptions:

[View](#) [Posts \(0\)](#) [Answers \(0\)](#) [Comments \(0\)](#) [Edit](#) [Favorites](#) [Mentions](#) [My Drafts](#) [Subscriptions](#) [Badges](#) [F](#)

**Tags and groups available to subscribe**

**Groups**  
  

<a href="#">Ensemble</a>	<input type="checkbox"/>
<a href="#">HealthShare</a>	<input type="checkbox"/>
<a href="#">Learning Services</a>	<input type="checkbox"/>
<a href="#">Worldwide Response Center (WRC)</a>	<input type="checkbox"/>
<a href="#">Field Tests</a>	<input type="checkbox"/>
<a href="#">Announcements</a>	<input type="checkbox"/>
<a href="#">Developer Community Feedback</a>	<input type="checkbox"/>
<a href="#">Compatibility</a>	<input type="checkbox"/>
<a href="#">Global Summit</a>	<input type="checkbox"/>

**Tags**  
  

<a href="#">General discussion</a>	<input type="checkbox"/>
<a href="#">Caché</a>	<input type="checkbox"/>
<a href="#">Caché Objects</a>	<input type="checkbox"/>
<a href="#">SQL</a>	<input type="checkbox"/>
<a href="#">Stored Procedures</a>	<input type="checkbox"/>
<a href="#">ODBC/JDBC</a>	<input type="checkbox"/>
<a href="#">Databases</a>	<input type="checkbox"/>
<a href="#">Globals</a>	<input type="checkbox"/>
<a href="#">Namespaces</a>	<input type="checkbox"/>

Please provide your feedback in comments below.

## 2. We simplified member the mentioning

To mention a member type @name.surname and he'll be notified.

Or you can copy mentioning formula on the [member's page](#) like on a screenshot below:

**Tag:** [@Robert Cemper](#)

Copy to clipboard

## 3. Enhancements in notifications

Now notification on comment always contains the previous context. And the previous context is placed before the comment, as it is posted in the discussion's page. E.g. here is the screenshot of a comment made by Steve Pisani:

Hi Robert,

If I have multiple values in datacombo box using by S

Can you please advise on this.

Thanks.

**Comment by [Arun Kumar](#) 5 February 2018**

[View Comment](#)

Hi Arun,

If you want a different tooltip (aka 'title' property of the datacombo box. That is - when the user (onchange?) which redefines the title property

Of course, somewhere you need to supply to the

Steve

[View Comment](#)

I like to see a lot of answers with sign Accepted and hope you too, don't you?

Sometimes we forget to put the sign on the answer even if there is an answer which is suitable to become "accepted".

So we introduce a new notification which comes to you weekly and sends the list of your questions, which have answers but you didn't peek any accepted answer yet.

You can alter that switch in Subscription-> Delivery of notifications section:

**Settings**

**Delivery of notifications**

☒ Receive notifications

You can temporarily suspend notifications from being sent.

☒ Receive notifications of unanswered own questions (Digest)

Receive notifications of unanswered own questions (contain answers, but no one is marked as correct)

It is On by default for all the members.

#### 5. Small bug fixes and enhancements

Commenting and Answering takes a lot of time to load the editor. It sped up by two times.

Members page now opens much faster.

A lot of small bugfixes were solved too and some new introduced ;)

#### 6. Public issues and tasks for DC

We introduced a [Community Github repo](#) to let you easily provide issues on bugs and enhancement requests for Developer Community site.

You are very welcome to add your own and comment current.

That's it! Hope you like it!

Please provide your feedback in comments below!
