Sending PDF to Printer using Cache - Windows

Hi All,

I need some help with sending PDF files to printer using cache instead of using third party tools(Adobe, foxit reader, etc..).
Sometime i getting access issue with the exe files.

Can able to send text data to printer using below code.

```
Set Dev="¦PRN¦PrinterName"
OPEN Dev:(/DATATYPE="TEXT"):80
USE Dev Write "Test printing",!
CLOSE Dev
```

Any suggestions on sending PDF to printer?

#Microsoft Windows #Object Data Model #Caché
