Server side source control hooks and Atelier - UserAction=3 is not working

I am trying to use current implementation of source Control for Cache Studio in Atelier, but UserAction = 3 "Run an EXE on the client" is not working. Basically Atelier is launching a "page" using the target as url.

Am I missing any settings in order to command Atelier to run a exe command instead?

Cache Version: Cache 2017.2.0.744.0

Platform: Windows 10
