How to Call a Custom Listing in MDX?

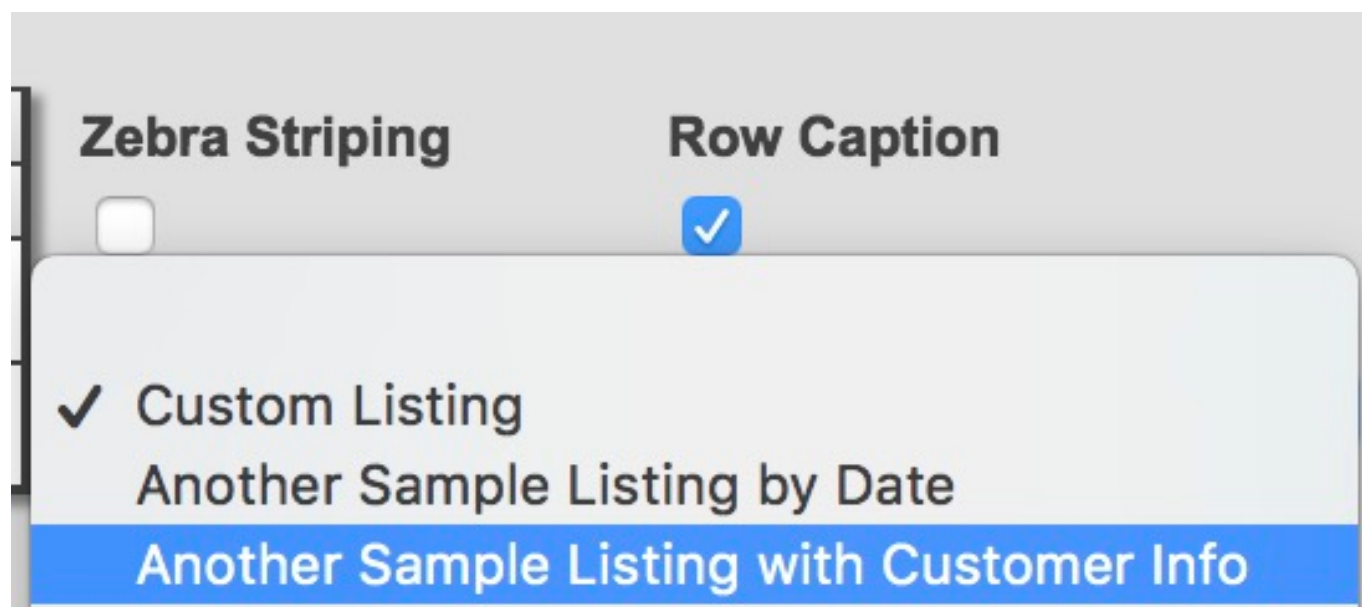

Hi, DeepSee experts!

I need to call a listing programmatically other than the default.

I can do that with [%LISTING](#) keyword. E.g. in Samples:

```
SAMPLES>d $SYSTEM.DeepSee.Shell()  
DeepSee Command Line Shell  
-----  
Enter q to quit, ? for help.  
>>DRILLTHROUGH SELECT FROM [HOLEFOODS] %LISTING [Listing]  
  
#  ID   Date City Chan Prod Unit  Reve Disc Comm  
1: 475  01/1  Madr Reta Life 1    0.92 20%  
2: 843  01/1  Manc Onli Frui 1    4.95 0%  
3: 808  01/1  Osak Onli Bund 4    79.8 0%
```

But how can I call custom listings in MDX? E.g. there are 3 custom listings available in SAMPLES HoleFoods Cube:

And they work in pivot but %LISTING says that it doesn't know them.

```
>>DRILLTHROUGH SELECT FROM [HOLEFOODS] %LISTING [Custom Listing]  
  
ERROR #5001: Listing does not exist: ('Custom Listing' @pos 63)  
>>
```
