^ISCSOAP Error Console Log

Hi.

The message is received a few times a day.

On documentation, this ^ISCSOAP^is log to service SOAP, but why send to cconsole.log?

04/04/18-01:00:00:597 (10608) 2 ^ISCSOAP in Namespace %SYS has been active for 348 day(s).

04/04/18-01:00:00:598 (10608) 2 ^ISCSOAP in Namespace X has been active for 165 day(s).

Help-me.

Tks
