## Indexes in Cache Objects

Hi-

I have the following objects

Class A

Property P1 As B

Property P2 As %String

Property P3 As %String

Class B

Property P1 As %String

Can I create an index in Class A based on P1.P1. Basically I want an index of class A by property P1 in class B

I tried creating the following but got a compile error

Index I1 On P1.P1

Thanks
