New Video: Secure File Communication

Hi Everyone!

New session recording from Global Summit 2017 is already on InterSystems Developers YouTube:

Secure File Communication

The task of this video is to allow simple, secure, and bidirectional file communication between end users and back-end systems. @ Steven LeBlanc uses the new managed File Transfer (mFT) capabilities to setup secure file communication between different parties.

In addition, please check InterSystems Online Learning Course.

What is more?

You are very welcome to join InterSystems Global Masters Advocacy Hub where you can also complete some Video challenges and many more other entertaining and informative challenges.

Feel free to ask any questions about the video in the comments of this post.

Enjoy! 🙂
