Create table for the results of a SQL statement

Is there a way to create a table for the results of a SQL statement ?

Example: Consider the below query and results.

Select ID,Name,DOB,Gender from EMS.EMS

RESULT

ID	NAME	DOB	Gender
1	Wijnschenk,Greta N.	03/09/2009	F
2	Klausner,Barbara L.	03/08/2014	M
3	Eastman,Liza X.	03/11/2000	F
4	O'Brien,Barb K.	03/07/2016	M
5	Anderson,Nataliya Y.	03/14/1991	F
6	Long,Debby Z.	03/12/1999	F
7	Rogers,Susan W.	03/12/1997	F
8	Ott,Lola J.	03/09/2009	F
9	Yu,Alice S.	03/14/1990	M
10	Wilson,Debby I.	03/12/1998	M

So, for the above results I want a table named EMS.BASIC which have properties NAME,DOB and Gender with the resulted values.

Thanks in advance.
