Installing CSP Gateway on Ubuntu Server.

Hello, I'm trying to install CSP Gateway on Ubuntu 18.04 (Apache) with the
installer CSPGateway-2018.1.1.638.0-lnxubuntux64.tar.gz but it doesn't seem to work. I keep getting access-
denied when I try to open CSP-pages or the CSP Management portal.

Does someone have an installation-manual or so ?
