(Webinar May 29) Optimizing Application Performance

Hi Everybody!

We are pleased to invite you to the upcoming webinar "Optimizing Application Performance" on 29th of May at 10:00 (Moscow time)!

A unique chance to talk about application performance.

Usually we face the performance issues when a problem has already arisen, along with users complaints. We want to share the experience of application development to minimize the risks of such situations and what do we need to do in order to understand the causes of the performance problem.

In particular, the following topics are planned to be considered in detail:

- What determines the performance;
- OS utilities to collect metrics;
- Caché \Ensemble utilities to collect metrics;
- Recommendations on coding;
- Recommendations on testing and application performance in production.

Presenter: @ Sergey Kudinov, InterSystems Sales Engineer.

Audience: The webinar is designed for developers.

Note: The language of the webinar is Russian.

We are waiting for you at our webinar! [Register now!](#) 👍
