Atelier 1.2 Beta Updates - May 2018

Over the past few months, our team has been hard at work building a better Atelier experience for you. With three major new features and more than twenty enhancements, Atelier 1.2.118 makes it easier for you to develop important applications. It now also supports [InterSystems IRIS Data Platform™](#), which enables you to rapidly build scalable, interoperable, and analytical data-rich applications.

Go to Line allows navigation to a specific tag+line (e.g.: MyProperty+12)

Open the BPL/DTL diagram editors from the new Tabbed Editor

Validate server configuration credentials

Code completion for Relationship class members

Open class and class member references from routines

Code coloring for HTML script tags

Uncluttered Atelier perspective

...

See the [Atelier 1.2 beta notes](#) for the full list of improvements. New to Atelier? Please follow the download instructions [here](#). As always, feel free to leave a comment and let us know what you think.

FAQ: Eclipse could not render the Atelier perspective after upgrading to Atelier 1.2 ([link](#))
