Hierarchy in DeepSee

Hi community,

I ' m working in a project for a Chile Police and I need to know if it ' s possible to build a hierarchy in Deepsee like Zone- Prefecture – Comisaria – Destacamentos (there are 4 levels of police units) , but these information are only in one table that has the code, the father ,description and UnitType. (it ' s recursive) . Example:

UNICODIGO	UNIPADRE	UNIDESCRIPCION
1	20	OTRA REPARTICION
10	2.380	38A. COM. PUENTE ALTO
20		DIR.NAC.SEGUR.Y ORDEN PUBLICO
30	8.855	TENENCIA CARRETERA ARICA
40	8.740	1RA. COM. ARICA (AGR)
45	40	1RA. COM. ARICA

The idea it ' s to build dimensions bases in expression to build this. Is it possible ?

Thanks a lot.
