Atelier connection broken error

Hi, every time I launch Atelier for the first time after my PC boot, it reports an error when trying to connect to a server.

Server Connection Configuration

Configure a Server Connection

✖ java.lang.ClassNotFoundException: Provider
org.glassfish.jersey.internal.RuntimeDelegateImpl could not be instantiated:

Connection Name: MASTER

Web Server Configuration

Address: 192.168.112.135

Web Port: 57773

☐ Secure connection

Credentials

Username: kutac

Password: ••••••••

☐ Show password

Test Connection

java.lang.ClassNotFoundException: Provider
org.glassfish.jersey.internal.RuntimeDelegateImpl could not be instantiated:
java.lang.IllegalStateException: No generator was provided and there is no default

Finish Cancel

Restarting Eclipse solves the issue and it no more manifests until next PC reboot.

Does anyone know how to avoid this issue? I run Windows 10, Java JRE 8
