Rescheduled Webinar: It's Machine Learning, Not Rocket Science (July 31, 11:00 a.m. EDT)

Hi Everybody!

The previous webinar rescheduled due to technical issues.

We are pleased to invite you again to the live webinar ["It ' s Machine Learning, Not Rocket Science"](#) on 31st of July at 11:00 a.m. EDT!

Machine learning for everyday business — no data scientist, no problem.

When applied to everyday business interactions, predictive models developed using machine learning can have a dramatic impact on customer experience, patient care, forecasting, public safety, risk management, and many other aspects of public and private sector operations. If you ' ve been putting off using machine learning because you believe you don ' t have the required talent and tools available, you ' ve waited long enough!

Join InterSystems Senior Sales Engineer [@Anton Umnikov](#) for [" It ' s Machine Learning, Not Rocket Science "](#) finally dive into machine learning. In today ' s world, with all the advancements in available tools and libraries, machine learning no longer belongs only in the specialist domains of data scientists. Software engineers in your IT organization are already equipped to work with machine learning and deliver business value. Anton will demonstrate this by building and running a machine-learning model for a fictional NYC food delivery company – yes, a food delivery company!

Note:

- The language of the webinar is English.
- The webinar will be recorded and posted to learning.intersystems.com following the broadcast.

We are waiting for you at our webinar! [Register now!](#)
