Intersystems Caché Senior Software Engineer - opportunity in London

Good afternoon everyone,

I hope you are well,

I am currently working on the below opportunity and if anyone here would like to hear more details please feel free to contact me on 01908 886 030 or teo.rusu@identifiglobal.com

Met with the client yesterday, beautiful office in Waterloo London, latest tech available with many benefits including working from home 2 days/w as well!

Intersystems Caché Senior Software Engineer

London

Salary up to £75,000 (negotiable for the right candidate)

An exciting Software as a Service company creating enterprise software used by 33,000+ people globally. They provides a secure, global cloud platform marketing teams use to rapidly expand services across channels and launch into new markets.

In a highly collaborative working environment their clients benefit from the best practices evolved from their work with many of the world 's largest banks, retailers, agencies, and outsource service providers. The Platform is the result of 15 years and \$18 million in continuous product innovation.

Location – London – more than beautiful, shared office spaces with the latest technology included. A place you join as an individual, 'me', but where you become part of a greater 'we'. A place where we ' re redefining success measured by personal fulfilment, not just the bottom line.

Job description

The business is a hosted, multi-tenanted SaaS solution. User data is partitioned logically by our data-security framework. All the User Data is retained till they are on the system and existing functionality is maintained (unless new feature explicitly replaces it, in which case there needs to outlined process replacement and migration of User Data). Data access/security is utmost important and be always done using existing data-security framework.

The role

You will be required to design, code, test and deliver practical and architecturally robust business solutions.

You will be expected to recognize impacts throughout the solution your code could incur and communicate these to the relevant people. You will document your code, when required, so other developers can easily understand functionality. Producing clean, maintainable code is key to our organisations ethos.

You will be working on features across our Platform plus integrations with third party systems (for example ERP solutions).

Required skills & experience

- 5+ year experience developing in Caché Objectscript, using CSP as web frontend
- Excellent understanding of SQL
- Working knowledge of MUMPs
- Enterprise product / project development experience
- HTML
- CSS
- Javascript

Desired skills & experience

- OOD background / experience
- Efficiency driven / optimised coding style
- Experience with SDLC methodologies, Version Control and software configuration management tools (preferably Jira)

If you are interested in hearing more about this opportunity please feel free to contact Teo Rusu on 01908 886 030 or teo.rusu@identifiglobal.com
