## Angular4 , webserver , deployment

Hello Everyone,

We are planning to build angular UI and Cache REST as backend. Can we deploy angular in Cache Private web server.

What would be the best way to do it. Did any one configure apache with csp gateway . if so can anyone guide me to a good document or some steps here which might help.

I have looked into this - <https://docs.intersystems.com/latest/csp/docbook/DocBook.UI.Page.cls?KEY...>

Somehow i am not able to join the dots .

[#API](#) [#Cache](#)
