Error when FTP folder is empty EnsLib.FTP.InboundAdapter

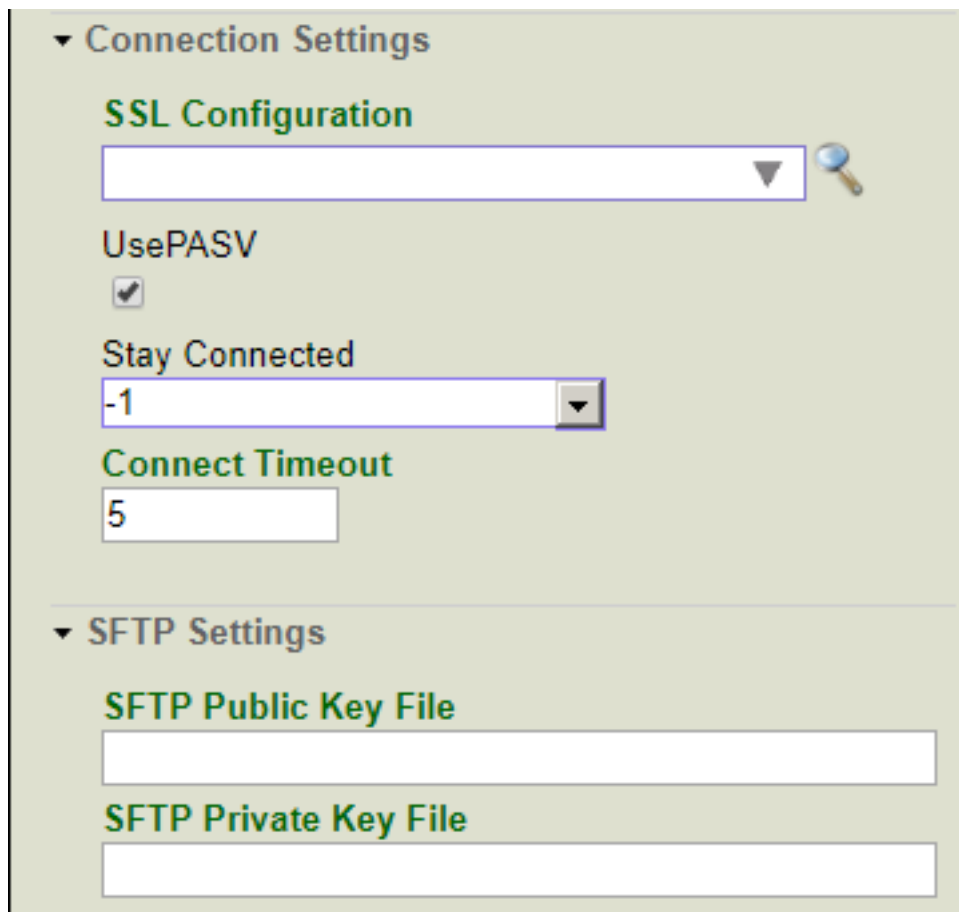

Hi community,

I've created a BS that uses FTP InboundAdapter. It works, read the file and process it.

The problem is when there not any file in the FTP folder, it raises the following error:

ERROR <Ens>ErrFTPListFailed: FTP: error en List para *.csv (mensaje='No-transfer-time exceeded. Closing control connection.',código=421)

I think it is something about the configuration, but I don't find what is the problem.

The screenshot shows the configuration window for the FTP InboundAdapter. It is divided into two main sections: Connection Settings and SFTP Settings.

Connection Settings

- SSL Configuration**: A dropdown menu with a search icon to its right.
- UsePASV**: A checkbox that is checked.
- Stay Connected**: A dropdown menu showing the value "-1".
- Connect Timeout**: A text input field containing the value "5".

SFTP Settings

- SFTP Public Key File**: A text input field.
- SFTP Private Key File**: A text input field.

▼ Additional Settings

Schedule

Pool Size

Use FileStream
☐

Server List Style

Subdirectory Levels

Charset

Append Timestamp

Confirm Complete

File Access Timeout

Semaphore Specification

Use Single Session
☐

HeaderCount

Synchronous Send
☐

Generate SuperSession ID
☐

Throttle Delay

Any idea?

Best regards,

Francisco Lopez
