How to replace \$lb elements with empty elements

I have a list

```
set list=$lb(1,$c(0),2)
```

How do I replace \$c(0) with an empty element?

My list should look like this:

```
set list=$lb(1,,2)
```

I tried using \$list but it either replaces the element with an empty string:

```
set $list(list,2)=""  
zw list
```

Resulting in:

```
list=$lb(1,"",2)
```

Or removes the element altogether:

```
set $list(list,2,2)=""  
zw list
```

Resulting in:

```
list=$lb(1,2)
```
