HTTP POST - unsupported media type - JSON

In a EnsLib.REST.Operation I have...

```
Set tSC=..Adapter.Post(.tHttpResponse,,pRequest.stream)
```

This sends JSON string over HTTP

I am getting this error back from the server

ErrHTTPStatus: Received non-OK status 415 from remote HTTP server: 'HTTP/1.1 415 Unsupported Media Type'

I have been told that the media type should be "JSON"

how do I go about changing the media-type of the HTTP Request?
