Atelier - Web application ERROR #5912

Hi All,

I'm practicing Atelier in Eclipse, but

While working CSP page.

1. Create new Web Application
2. Open CSP Web Application in Atelier Project
3. New CSP page -> Save

i'm getting below error Message.

/testv1/test.csp was saved locally but could not be saved remotely.

ERROR #5912: Page '/testv1/test.csp' does not exist

test.csp is saved locally but could not be saved remotely.

Reason: /testv1/test.csp was saved locally but could not be saved remotely.

ERROR #5912: Page '/testv1/test.csp' does not exist

i'm using MacOS with Eclipse Atelier.

If i use base csp/<namespace> web application it not throw any error.

Please share your idea to resolve.

Thanks,
