Unconference at Global Summit 2018

Unconferences have been described as “ networking on steroids. ” They are the ultimate peer-to-peer discussion experience, and have been a vital part of InterSystems Global Summit for the past few years.

To ensure that this year's Unconference at Global Summit is better than ever, we want to know what YOU want to discuss with peers and industry leaders. Please follow the link below to submit your Unconference topic for 2018! Feel free to submit as many as you would like. Keep in mind that topics should be technology-related and relevant to conversations your peers will also be interested in. Topics are most successful when they focus on solutions and collaborative discussion.

If you have any questions, please reach out to unconference2018@intersystems.com

We are looking forward to seeing you in [San Antonio](#)!

[Click here to submit a topic for the Unconference!](#)

Topics can be submitted until noon October 1, 2018. Voting will take place in the afternoon of the same day, and will only be available for attendees of the conference.
