George James Software lunchtime meeting at Global Summit 2018

If you are attending Global Summit 2018 please be sure to say hello to George James Software in the Partner Pavilion.

You are also invited to the informal lunchtime meeting we're hosting at Global Summit on Tuesday 2nd October from 1pm in Indian Paintbrush, a meeting room at the conference venue. We will be previewing the next versions of Deltanji, our integrated source code management solution, and Serenji, our editor and debugger.

It's also an opportunity for existing and prospective users of our tools to meet one another. Food will be available at the meeting room from 12.45, courtesy of InterSystems.

We hope to see you there.

John Murray
George James Software
