Zen reports - Error rendering Excel output

Hi,

We maintain a few Zen reports that output in Excel format.

Recently we started to observe that some reports fail and return the following error.

```
CSP error occurred
Error: Error rendering: OS code =1Use $log=1 to check
ErrorNo: 5001
```

I have extracted the exception details from the log file

```

Has anyone seen this exception rendering Zen Reports?

Regards,

Rui
