InterSystems Caché and Ensemble 2018.1 Release

InterSystems is pleased to announce that InterSystems Caché and Ensemble 2018 are now released!

New in these releases are features that improve security and operations, including:

- Key Management Interoperability Protocol (KMIP) support
- Microsoft Volume Shadow Copy (VSS) integration
- Integrated Windows Authentication support for HTTP
- SSH enhancements

The releases also include many important updates and fixes.

See the [documentation](#) for release notes and upgrade guides for both Caché and Ensemble. The platforms for these releases are the same as for 2017.2. Full details can be found in [this supported platforms document](#).
