Breaking News: InterSystems IRIS for Health - The New InterSystems Data Platform for Healthcare Applications!

Hi Community!

I'm pleased to announce that we've just launched the new product in the family of InterSystems Data Platforms:

[InterSystems IRIS for Health](#)

IRIS for Health — is the world ' s first and only data platform engineered specifically for healthcare. It empowers you to rapidly create and scale the industry ' s next breakthrough applications.

Advanced FHIR-Based Solution Development

Represent all of your data as FHIR resources, and use our FHIR Server to simplify data sharing. Advanced development tools enable you to map between legacy data formats and FHIR to help you increase the value of legacy systems.

Certified Healthcare Interoperability

Deep support for FHIR, HL7 V2, IHE and other standards and protocols* ensures interoperability and improved workflow across the care continuum.

*ASTM, CDA® and CCD®, CCDA, DICOM, EDI – ASC X12, HL7 V3, NCPDP, EDIFACT, ITK (England), DMP and HPRIM (France), SS-MIX (Japan), ADHA (Australia), xDT (Germany)

Seamless Data Management

Seamlessly handle multiple forms of data at high speed, with vertical and horizontal scalability. Rapidly build solutions using the tools and technologies that best suit your needs.

Open Analytics

Empower solutions using our open analytics platform, with your choice of embedded, standards-based, and best-of-breed analytics technologies for exploration, analysis, and prediction.

[The official press release here!](#)

Stay tuned and we'll share with you more information on our new Data Platform!
