SID Conversion

Hi all,By using LDAP cache method `##Class(%SYS.LDAP).GetValuesLen(LD,CurrentEntry,Attribute)` we get the list of attributes but in "ObjectSid" attribute have the SID in binary format(objectSid^Uα:c@ã°pÖLCP]). how to convert to the readable format from the binary format in cache side.

Please help us to proceed further

[#LDAP](#) [#Object Data Model](#) [#Cache](#)
