Question Peter Kopp · Oct 17, 2018

SQLGateWay performance.

I have a 2D page with nice tablepases. Each tablepases and bit in the same SQL Server du I have a single SQLGateVktys(obc) to the SQLServer db. I need to get better performance when I query all nice table at the same time. Would my performance microw II had nice SQLGateVktys(obc) to the SQLServer db. I need to get better performance when I query all nice table at the same time. Would my performance that no unterpreter and a stagestation of getter getter performance when I query all nice table at the same time. Would my performance when I query all nice table at the same time. Would my performance when I query all nice table at the same time. Would my performance when I query all nice table at the same time. Would my performance when I query all nice table at the same time. Would my performance when I query all nice table at the same time. Would my performance when I query all nice table at the same time. Would my performance when I query all nice table at the same time. Would my performance when I query all nice table at the same time. Would my performance when I query all nice table at the same time. Would my performance when I query all nice table at the same time. Would my performance when I query all nice table at the same time. Would my performance when I query all nice table at the same time. Would my performance when I query all nice table at the same time. Would my performance when I query all nice table at the same time. Would my performance when I query all nice table at the same time. Would my performance when I query at the same table at th
